NIBD Welfare Society

اُمید سے شِفا تک

ANNUAL REPORT | 2025-2026

The National Institute of Blood Disease (NIBD) Welfare Society is a registered non-profit organisation, established in 2009 under Section (7) of the Voluntary Social Welfare Agencies (Registration and Control) Ordinance 1961 and Rule 1962. Since its inception, the Society has remained committed to supporting individuals affected by serious blood disorders such as leukaemia, lymphoma, thalassaemia, and aplastic anaemia.

For thousands of Pakistanis, particularly women and children, a diagnosis of blood cancer or thalassaemia is a life-altering reality. The cost of treatment, laboratory tests, and medication imposes an overwhelming burden on families, often placing life-saving care beyond their reach. Recognising this urgent need, the NIBD Welfare Society was founded to provide hope, support, and access to quality treatment for patients who would otherwise be denied care due to financial hardship.

A Journey of Growth and Impact

1995

FIRST BONE MARROW TRANSPLANT IN PAKISTAN

The country's first bone marrow transplant was performed by Dr. Tahir Sultan Shamsi, marking a historic achievement in Pakistan's medical landscape. This pioneering success laid the groundwork for the development of advanced hematology services nationwide.

2008

FOUNDATION OF THE NATIONAL INSTITUTE OF BLOOD DISEASE & BONE MARROW TRANSPLANT

National Institute of Blood Disease & Bone Marrow Transplant (NIBD) was established as Pakistan's first comprehensive centre dedicated to the diagnosis, treatment, research, and training in blood diseases and bone marrow transplantation.

2009

REGISTRATION OF NIBD WELFARE SOCIETY

The National Institute of Blood Disease (NIBD)Welfare Society was formally registered under the Voluntary Social Welfare Agencies Ordinance, 1961, with the purpose of supporting underprivileged patients suffering from blood disorders and blood cancers.

2010

THALASSAEMIA / HAEMOPHILIA SUPPORT PROGRAMME LAUNCHED

A structured support programme was introduced to assist patients requiring lifelong care and frequent transfusions. It supports treatment, blood products, counselling, and disease-management awareness.

A Journey of Growth and Impact

2013

LAUNCH OF M.PHIL IN HAEMATOLOGY AT NIBD INSTITUTE OF LIFE SCIENCES

This academic programme was initiated to develop highly skilled hematology professionals, enhancing Pakistan's clinical and research capacity in blood sciences.

2014

NIBD POST GRADUATE INSTITUTE OF LIFE SCIENCES BILL PASSED

The Sindh Assembly approved the Institute's Bill with support from the NIBD Welfare Society, paving the way for structured medical education and advanced research facilities.

2016

FIRST ISSUE OF THE "JOURNAL OF HEALTH SCIENCES" PUBLISHED

The inaugural peer-reviewed scientific journal was launched, creating a platform for promoting research and knowledge-sharing in health sciences.

2020

EXPANSION OF THE BONE MARROW TRANSPLANT DEPARTMENT AT GENERAL HOSPITAL LAHORE

Under the supervision of Dr. Tahir Sultan Shamsi, the NIBD team supported the establishment and expansion of transplant facilities in the public sector to meet rising patient needs. This initiative significantly improved provincial access to advanced transplant services.

A Journey of Growth and Impact

2020

PLASMA THERAPY SUPPORT PROGRAMME

Initiated during the pandemic to support critical patients through convalescent plasma, improving emergency treatment access during the crisis.

2021

ESTABLISHMENT OF NIBD LAHORE CAMPUS

The Lahore campus was established to decentralize hematology and transplant services, expanding diagnostic, treatment, and training facilities for the Punjab region.

2023

ESTABLISHMENT OF NIBD HYDERABAD CAMPUS

The Hyderabad campus brought specialized blood disease services closer to patients in interior Sindh, enhancing regional healthcare delivery with diagnostics, clinics, and academic programme.

A Journey of Growth and Impact

2025

LAUNCH OF THE 100 BONE MARROW TRANSPLANTS (BMT) PROGRAMME

The programme was launched to support curative bone marrow transplants for 100 deserving patients, reaffirming the Welfare Society's long-term commitment to saving lives.

2026-27

PLANNED NIBD QUETTA CAMPUS

The upcoming Quetta campus will extend specialized hematology and transplant services to Balochistan, offering diagnostic, clinical, and educational facilities in a region with limited specialized care.

2028

PLANNED NIBD PESHAWAR CAMPUS

The Peshawar campus will strengthen NIBD's national network by delivering blood disease care, transplant services, and capacity-building programme for healthcare professionals in Khyber Pakhtunkhwa.

Across Pakistan

Many families facing blood cancer or thalassaemia struggle with the high cost of treatment, diagnostics, and medicines. For most, these expenses place essential care beyond reach at a time when it is needed most.

The NIBD Welfare Society was created to reduce this gap by supporting patients who cannot afford life-saving treatment. Through donor-funded programmes, we assist with chemotherapy, immunotherapy, bone marrow transplants, and key diagnostic services for both children and adults.

> “Our purpose is simple: to ensure that financial hardship does not prevent access to care. With the continued support of our donors, we remain committed to helping patients receive timely, quality treatment.”

Every Child Deserves a Tomorrow.

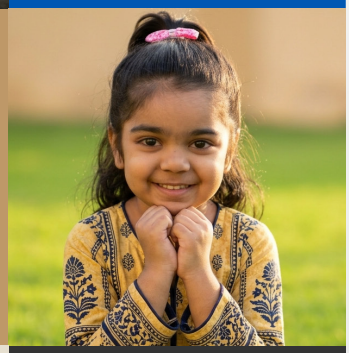

Hope Begins with Care.

Little Lives. Big Dreams.

Care Beyond the Diagnosis.

Together, We Make Hope Possible.

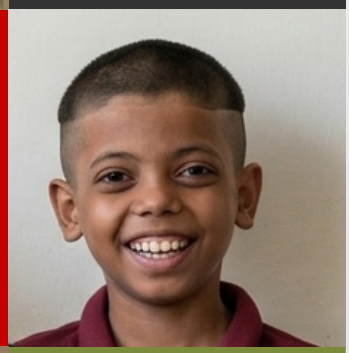

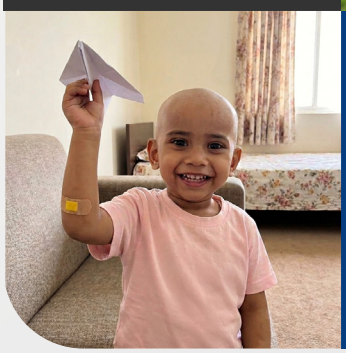

Every Smile Matters.

Standing Beside Every Brave Heart.

More Than Treatment. A Future.

Turning Compassion into Care.

Because Every Life Is Precious.

Our Founding Story

The NIBD Welfare Society was founded by the late Prof. Dr. Tahir Sultan Shamsi, a pioneering physician and the first to perform a successful bone marrow transplant in Pakistan in 1995. This landmark achievement opened new possibilities for patients with blood cancers and serious blood diseases, offering curative treatment where none previously existed.

Driven by his compassion and commitment to equitable healthcare, Prof. Shamsi dedicated his work to making advanced treatment accessible to those who could not afford it.

Late Prof. Dr. Tahir Sultan Shamsi has been nominated for the prestigious ***Sitara-e-Imtiaz***, to be conferred in 2027, in recognition of his remarkable contributions to haematology and bone marrow transplantation in Pakistan.

Today, the Society continues his mission by supporting bone marrow transplants, advanced therapies, diagnostics, and essential medicines for underprivileged patients.

Our focus remains on expanding access to life-saving care, strengthening healthcare support systems, and ensuring that financial barriers do not stand between patients and treatment.

Each patient we support reflects the lasting impact of Prof. Shamsi's vision. His legacy lives on through every life saved and every family given hope.

Message General Secretary

It is my privilege to present the Annual Report of the NIBD Welfare Society for 2025–26. The year under review reflects steady progress in our shared mission, made possible through the continued trust and generosity of our supporters.

Founded by my late father, Prof. Dr. Tahir Sultan Shamsi, the NIBD Welfare Society was established to ensure that financial constraints do not prevent patients from receiving essential, life-saving treatment. This guiding principle continues to shape all our efforts in supporting patients and their families.

During the past year, donor support enabled us to assist patients requiring bone marrow transplants, chemotherapy, immunotherapy, blood product transfusions, and diagnostic services. These interventions have helped improve outcomes and restore hope for many families, reflecting the strength of collective effort between donors, clinicians, and the Society.

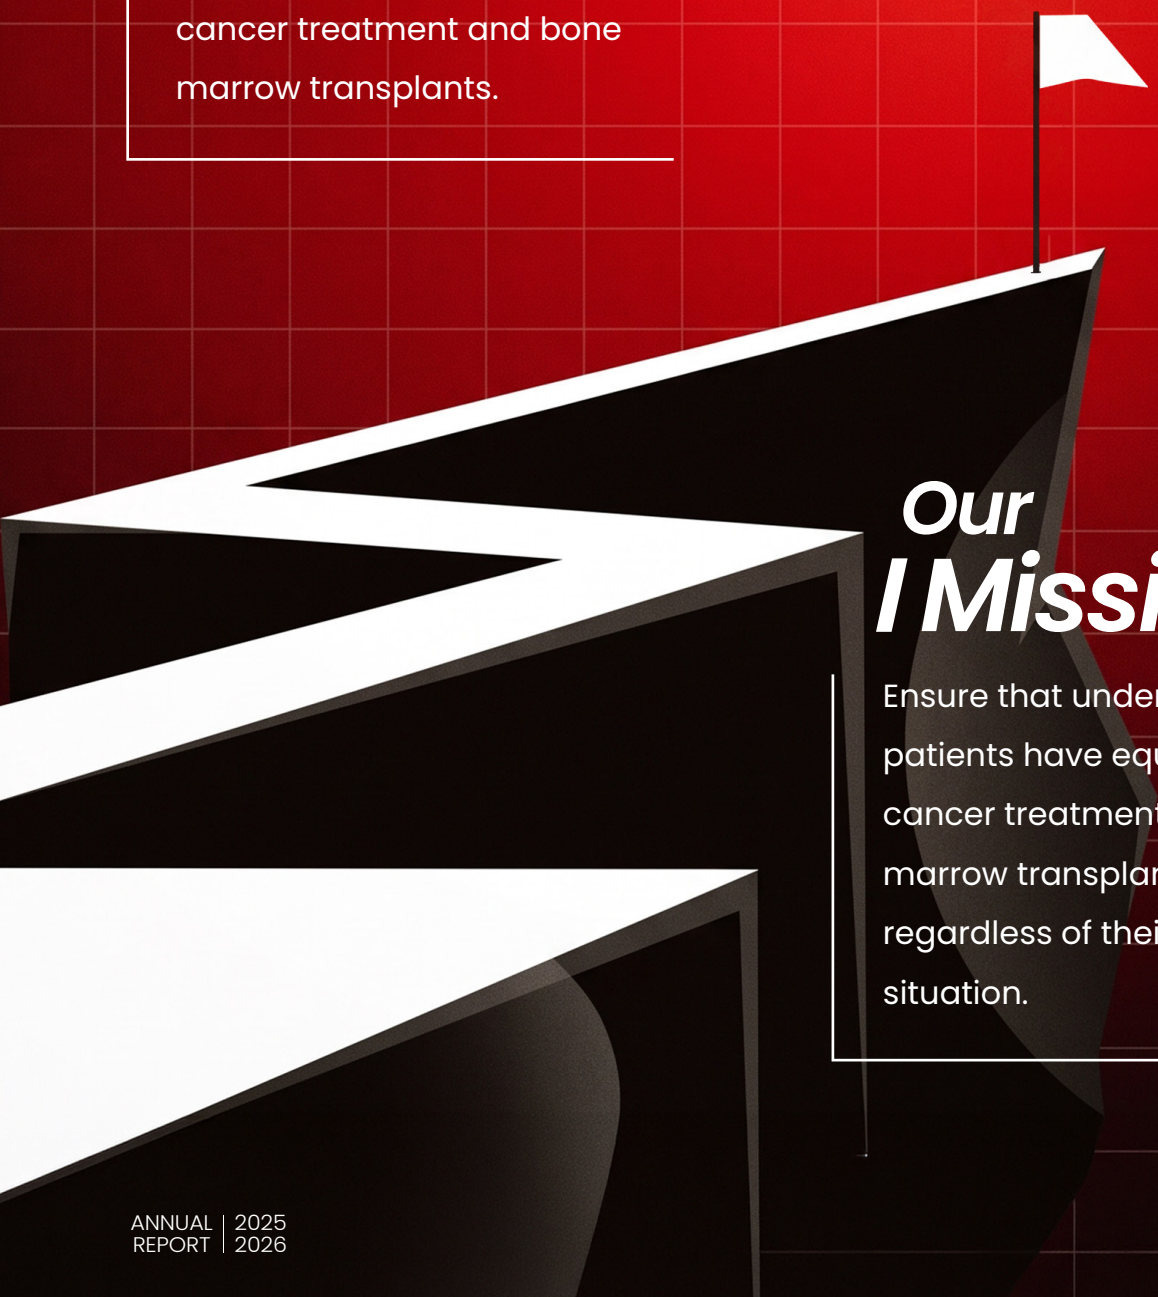

Looking ahead, we remain focused on strengthening resource mobilization and expanding partnerships to ensure more sustainable and wider access to care. Our objective is to support patients not only in moments of urgency but throughout their treatment journey.

We are deeply grateful to all our donors and partners whose continued support makes this work possible.

USAMA SULTAN SHAMSI

Our Vision

Advancing care through community partnerships by providing crucial financial support to patients undergoing cancer treatment and bone marrow transplants.

Our Mission

Ensure that underprivileged patients have equal access to cancer treatments and bone marrow transplantation, regardless of their financial situation.

Our Guiding Values

Collaboration

We believe meaningful impact is achieved through partnership. By working closely with donors, hospitals, medical professionals, and community organizations, we strengthen our ability to reach more patients and deliver more effective support.

Empathy

We recognize that illness affects not only the body but also the emotional and financial well-being of patients and their families. Our approach is shaped by deep empathy, allowing us to respond with care that is thoughtful, humane, and responsive to their lived realities.

Respect

We believe every individual deserves dignity and equal care. Regardless of social or economic background, each patient is treated with compassion, sensitivity, and professionalism. Respect is central to how we engage with patients, families, and healthcare partners, ensuring that human dignity is preserved at every step of care.

Sustainability

We focus on building long-term systems of care that go beyond immediate relief. Our goal is to ensure continuous access to treatment by developing sustainable funding models and scalable support structures that can serve patients consistently over time.

Transparency

We are committed to openness, accountability, and ethical stewardship. All contributions are carefully recorded and utilized with responsibility, ensuring that our donors and stakeholders have complete confidence in how resources are managed and deployed.

MEET THE TEAM OF OUR IMPLEMENTING PARTNER & TREATING INSTITUTION

NIBD® National Institute of Blood Disease & Bone Marrow Transplantation

The NIBD & BMT team brings together experienced haematologists, bone marrow transplant specialists, paediatric experts, nurses and allied healthcare professionals. With multidisciplinary expertise and a patient-centred approach, the team delivers specialised care across the spectrum of blood diseases, blood cancers and bone marrow transplantation, working together to improve outcomes and bring hope to patients and families.

Dr. Shafaq Abdul Samad

Dr. Shafaq Abdul Samad is an Assistant Professor and Consultant Clinical Haematologist, serving as Director, BMT Program at NIBD & BMT.

An EBMT-Certified BMT Physician, she specialises in stem cell transplantation, haematological disorders, clinical research and postgraduate medical education.

Dr. Saima Siddiqui

Dr. Saima Siddiqui is a Consultant Haematologist at NIBD & BMT with over 20 years of experience.

She specialises in inherited blood disorders, including thalassaemia, haemophilia and bleeding disorders, and performs prenatal diagnosis through chorionic villus sampling (CVS).

Dr. Tasneem Farzana

Dr. Tasneem Farzana is a Senior Consultant Haematologist and BMT Specialist with extensive experience in haematology and bone marrow transplantation.

With over 50 research publications, she has contributed significantly to advancing BMT services, specialist training and haematology care across Pakistan.

Dr. Aisha Jamal

Dr. Aisha Jamal is a Consultant Clinical Haematologist and BMT Physician at NIBD & BMT, leading the Acute Leukaemia Programme.

She specialises in acute leukaemias, complex blood disorders, high-intensity chemotherapy and stem cell transplantation, alongside contributions to clinical research and postgraduate medical education.

Dr. Ali Saleem

Dr. Ali Saleem is an Assistant Professor and Consultant Clinical Haematologist at NIBD & BMT, with specialised training in malignant haematology and bone marrow transplantation.

His clinical expertise focuses on complex blood cancers, advanced transplant care and the evidence-based management of haematological disorders.

Dr. Qurratulain Rizvi

Dr. Qurratulain Rizvi is an Assistant Professor and Consultant Clinical Haematologist at NIBD & BMT, serving as Section Head, Lymphoma and Myeloma.

With fellowship training in Malignant Haematology and BMT, she specialises in leukaemias, lymphomas, multiple myeloma and stem cell transplantation. She is also actively engaged in clinical research, medical education and multidisciplinary patient care.

Dr. Zainab Ghias

Dr. Zainab Ghias is a Consultant Paediatric Haematologist at NIBD & BMT, specialising in childhood blood disorders, leukaemia and paediatric bone marrow transplantation.

With advanced training in Paediatrics and Clinical Haematology, she provides comprehensive care for infants, children and adolescents with complex haematological conditions.

Dr. Muhammad Yousuf

Dr. Muhammad Yousuf is a Consultant Clinical Haematologist at NIBD & BMT and an EHA-certified specialist.

His expertise includes benign and malignant blood disorders, transfusion medicine, bone marrow procedures and stem cell transplantation. He is also actively involved in postgraduate medical education and clinical research.

Dr. Muhammad Adil Yaseen

Dr. Muhammad Adil Yaseen is a Consultant Clinical Haematologist, Haemato-Oncologist and BMT Physician.

His expertise includes complex blood disorders, haematological malignancies and autologous and allogeneic stem cell transplantation. He also contributes to expanding specialised haematology and BMT services in Balochistan.

Governance, Transparency & Shariah Compliance

At NIBD Welfare Society, we consider transparency, accountability, and shariah compliance as guiding principles embedded into every aspect of our operations. To uphold these standards, we have established a robust governance and controls framework, which includes:

Legal Registration

NIBD Welfare Society is a non-profit organization, registered under Section (7) of the Voluntary Social Welfare Agencies (Registration and Control) Ordinance 1961 and Rule 1962 with the Social Welfare Department, Government of Sindh.

Independent Financial Audits

Our financial statements are audited annually by a QCR-rated audit firm by ICAP that is also a Tier 1 auditor notified by Securities and Exchange Commission of Pakistan's (SECP) and have its international affiliation with Alliance Global (allinialglobal.com). This ensures that our financial practices meet the highest professional standards of accuracy and integrity.

Certified Shariah Compliance

We have appointed Alhamd Shariah Advisory Services as our official Shariah Advisor. They are responsible for reviewing and certifying that all Zakat collections, welfare disbursements, and charitable spending strictly adhere to Islamic principles and jurisprudence.

Pakistan Centre for Philanthropy (PCP) Certification

NIBD Welfare Society is certified by the PCP, recognizing our strong performance in the areas of governance, financial transparency, and program effectiveness. This endorsement further validates our institutional credibility.

Tax Exempt Status by FBR

We are an officially recognized non-profit organization by the Federal Board of Revenue (FBR) and maintain a tax exemption status under sub-clause (c) of clause (36) of section 2 of the Income Tax Ordinance, 2001, in accordance with Rules 212 and 220 of the Income Tax Rules, 2002.

These regulatory endorsements and institutional safeguards ensure that every rupee donated is utilized with purpose, accountability, and in full compliance with both legal and ethical standards.

ALHAMD SHARIAH ADVISORY SERVICES
(PVT) LIMITED

SHARIAH APPROVAL FOR PAYING ZAKAT FUNDS TO NIBD WELFARE SOCIETY

Date of Issuance: 15 September 2026
Certificate No: ASA/285/003

Introduction

NIBD Welfare Society is a non-profit organization committed to providing financial and medical support to deserving patients, particularly those suffering from blood disorders, cancer and requiring bone marrow transplantation and related treatment.

Method of Utilization of Zakat

NIBD Welfare Society receives Zakat on behalf of deserving and Shariah-eligible beneficiaries under a Wakalah arrangement. The Society assesses the financial position and Zakat eligibility of applicants and refers eligible cases to the Shariah Advisor for review and approval. After approval, the relevant treatment is provided and Zakat funds are utilized against the approved eligible medical expenses. Zakat funds are maintained separately and are subject to periodic Shariah review and reconciliation.

Shariah Ruling

Alhamd Shariah Advisory Services (Pvt.) Limited has reviewed the Zakat collection, management and utilization system of NIBD Welfare Society, including the annual records for the year ended 30 June 2026. Based on the information, records and confirmations provided to us, and subject to continued implementation of the approved Zakat mechanism and Shariah oversight, we hereby confirm that NIBD Welfare Society is approved to receive and utilize Zakat funds on behalf of Shariah-eligible beneficiaries in accordance with the approved mechanism.

Accordingly, a donor may pay Zakat to NIBD Welfare Society for utilization under this approved system, and such Zakat shall be administered for eligible beneficiaries in accordance with the applicable Shariah requirements.

May Allah Almighty accept the efforts of the donors and management and grant the best reward for their services. Allah knows best.

Note: This approval is valid until 30 June 2027, subject to continuation of the Shariah advisory engagement and compliance with the approved Zakat mechanism.

Subject: Issuance of NPO Certification Award – NATIONAL INSTITUTE OF BLOOD DISEASES WELFARE SOCIETY

Dear Mr. Usama Sultan Shamsi,

Congratulations.

I am pleased to inform you that the Certification Panel has accepted the request of NATIONAL INSTITUTE OF BLOOD DISEASES WELFARE SOCIETY for Certification, in the Certification Panel meeting held on 26th May, 2025. Please find enclosed the certificate and a detailed evaluation report for your record.

Since the organization was evaluated for the years 2022, 2023 and 2024, the organization is required to approach the Centre again for renewal of certification once the audited accounts for the years 2025 ,2026 and 2027 are finalized.

We look forward to a continued relationship in the effort towards strengthening the role of civil society in the sustainable social development of Pakistan.

Regards,

Naveed Yousaf

Our Programs
Bone Marrow Transplant (BMT) Support Programme

Bone marrow transplant (BMT) is a curative treatment for patients suffering from life-threatening blood diseases such as Acute Leukaemia, Beta Thalassaemia Major, Aplastic Anaemia, and Bone Marrow Failure Syndromes. For many families in Pakistan, however, the cost of this procedure remains prohibitively high, placing it beyond reach despite its life-saving potential.

Through the BMT Support Programme

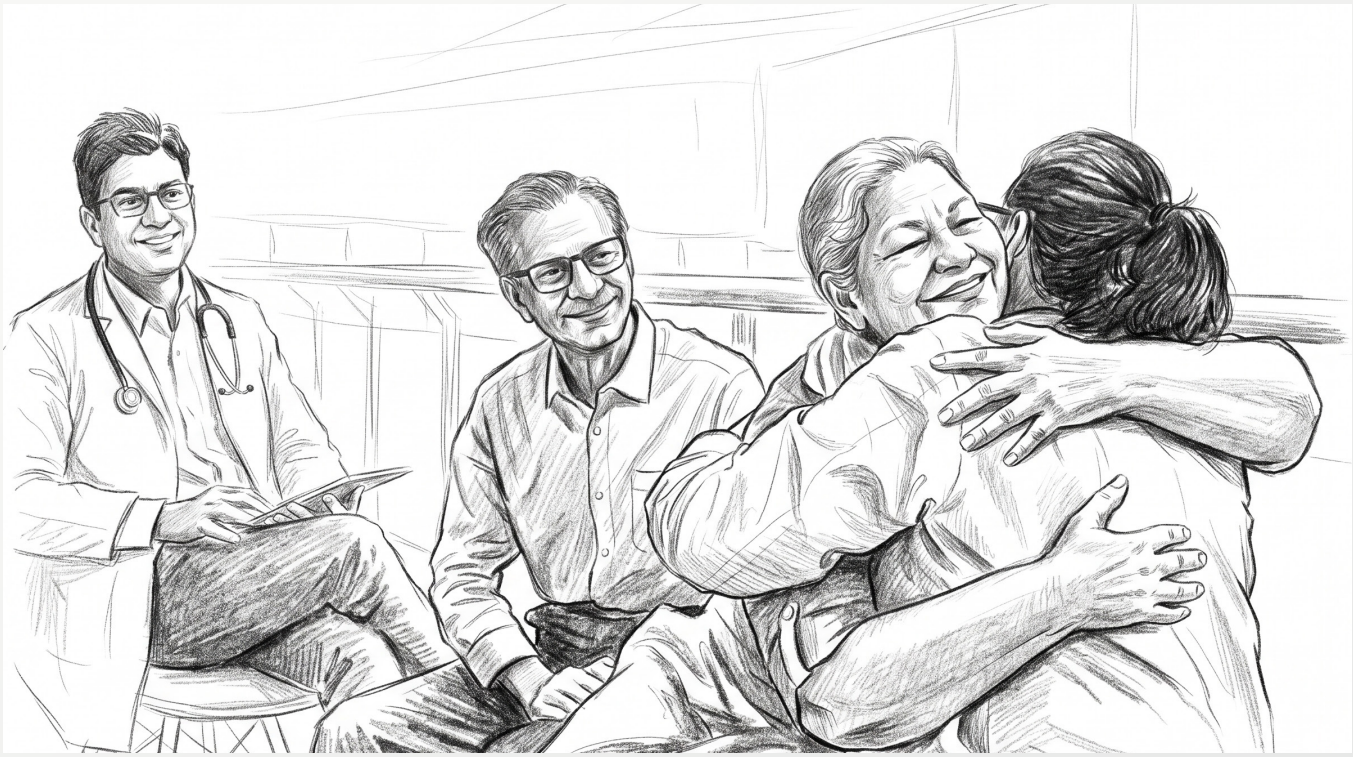

This programme prioritises patients from underserved communities through strict medical and financial assessment in collaboration with partner hospitals and healthcare providers. Each funded transplant not only saves a life but also restores stability and hope to entire families.

The NIBD Welfare Society remains committed to transparency and accountability. Donors are provided with regular updates on patient progress, and annual consolidated reporting ensures full visibility of outcomes and fund utilisation.

The NIBD Welfare Society provides full financial assistance to underprivileged patients in need of transplant care. Each sponsorship covers the complete treatment cycle, including diagnostic evaluation, chemotherapy, transplant procedure, hospital stay, and one-year post-transplant follow-up, ensuring continuity of care and improved survival outcomes.

Pakistan continues to face a significant burden of inherited and acquired blood diseases, where BMT often represents the only curative option. With treatment costs ranging between **PKR 5.5 Million to 7.5 Million**, most low-income families are unable to access this care without external support.

Care Program
One year of support, a lifetime of dignity.

The CARE Program provides essential monthly transfusion support for patients living with Thalassemia and Hemophilia. These chronic conditions require lifelong access to blood and blood product transfusions, yet many families in Pakistan are unable to bear the recurring costs required to sustain treatment.

Through this programme, the NIBD Welfare Society ensures uninterrupted transfusion support for vulnerable patients, enabling them to survive and live with dignity. Each sponsorship covers a full year of care, allowing patients to continue education, daily life, and growth without the constant fear of interrupted treatment.

The annual cost of supporting one patient is **PKR 200,000 per annum**, covering blood and blood products, day care services, outpatient consultations, laboratory testing, and essential pharmacy support.

The programme aims to support these patients, creating a sustained safety net for children and adults who depend on regular transfusions for survival.

Pakistan carries a significant burden of thalassemia and haemophilia, both of which require consistent and lifelong medical care. In the absence of regular transfusions, patients face severe complications including organ damage, disability, and reduced life expectancy. The CARE Program directly addresses this gap by ensuring continuity of care for patients who would otherwise be unable to afford treatment.

Patients are identified through the NIBD Welfare Society and partner healthcare institutions, and are enrolled after medical and financial assessment. Donors may sponsor an individual patient for one year, with structured reporting provided throughout the support period.

The Society remains committed to transparency and accountability. Donors receive regular updates on patient progress, while annual consolidated reports provide full visibility of programme outcomes and fund utilisation.

Through the CARE Program, each sponsorship represents more than treatment. It represents stability, dignity, and the chance for a child or adult to live a fuller life despite chronic illness.

Life Program
One screening can open the door to a cure.

The LIFE Program supports essential screening and diagnostic investigations for patients suffering from Beta Thalassaemia Major and Aplastic Anaemia, where bone marrow transplant (BMT) may offer the only chance of cure. Before treatment can begin, patients require critical tests such as HLA typing, genetic profiling, bone marrow diagnostics, and viral marker screening to determine transplant eligibility and donor compatibility.

For many low-income families, the cost of these investigations remains unaffordable, delaying diagnosis and limiting access to life-saving treatment. Through the LIFE Program, the NIBD Welfare Society helps remove these barriers by funding diagnostic support for underprivileged patients.

Pakistan continues to face a significant burden of blood diseases and blood cancers, where delayed diagnosis often leads to worsening health outcomes and missed opportunities for timely intervention. Among all investigations, HLA typing remains one of the most important components, as it determines donor compatibility and directly influences transplant success.

The programme focuses on early detection, timely referral pathways, and collaborative outreach efforts to ensure patients can move toward treatment with greater clarity and confidence. Through partnerships with healthcare institutions, welfare organisations, and donors, the LIFE Program continues to strengthen access to care for vulnerable communities across Pakistan.

The NIBD Welfare Society remains committed to transparency and accountability, with structured donor reporting and regular programme updates ensuring clear visibility of impact and fund utilisation.

> “Through the LIFE Program, every diagnostic sponsorship represents more than a medical test. It represents the possibility of treatment, recovery, and renewed hope for patients and their families.”

Success Stories

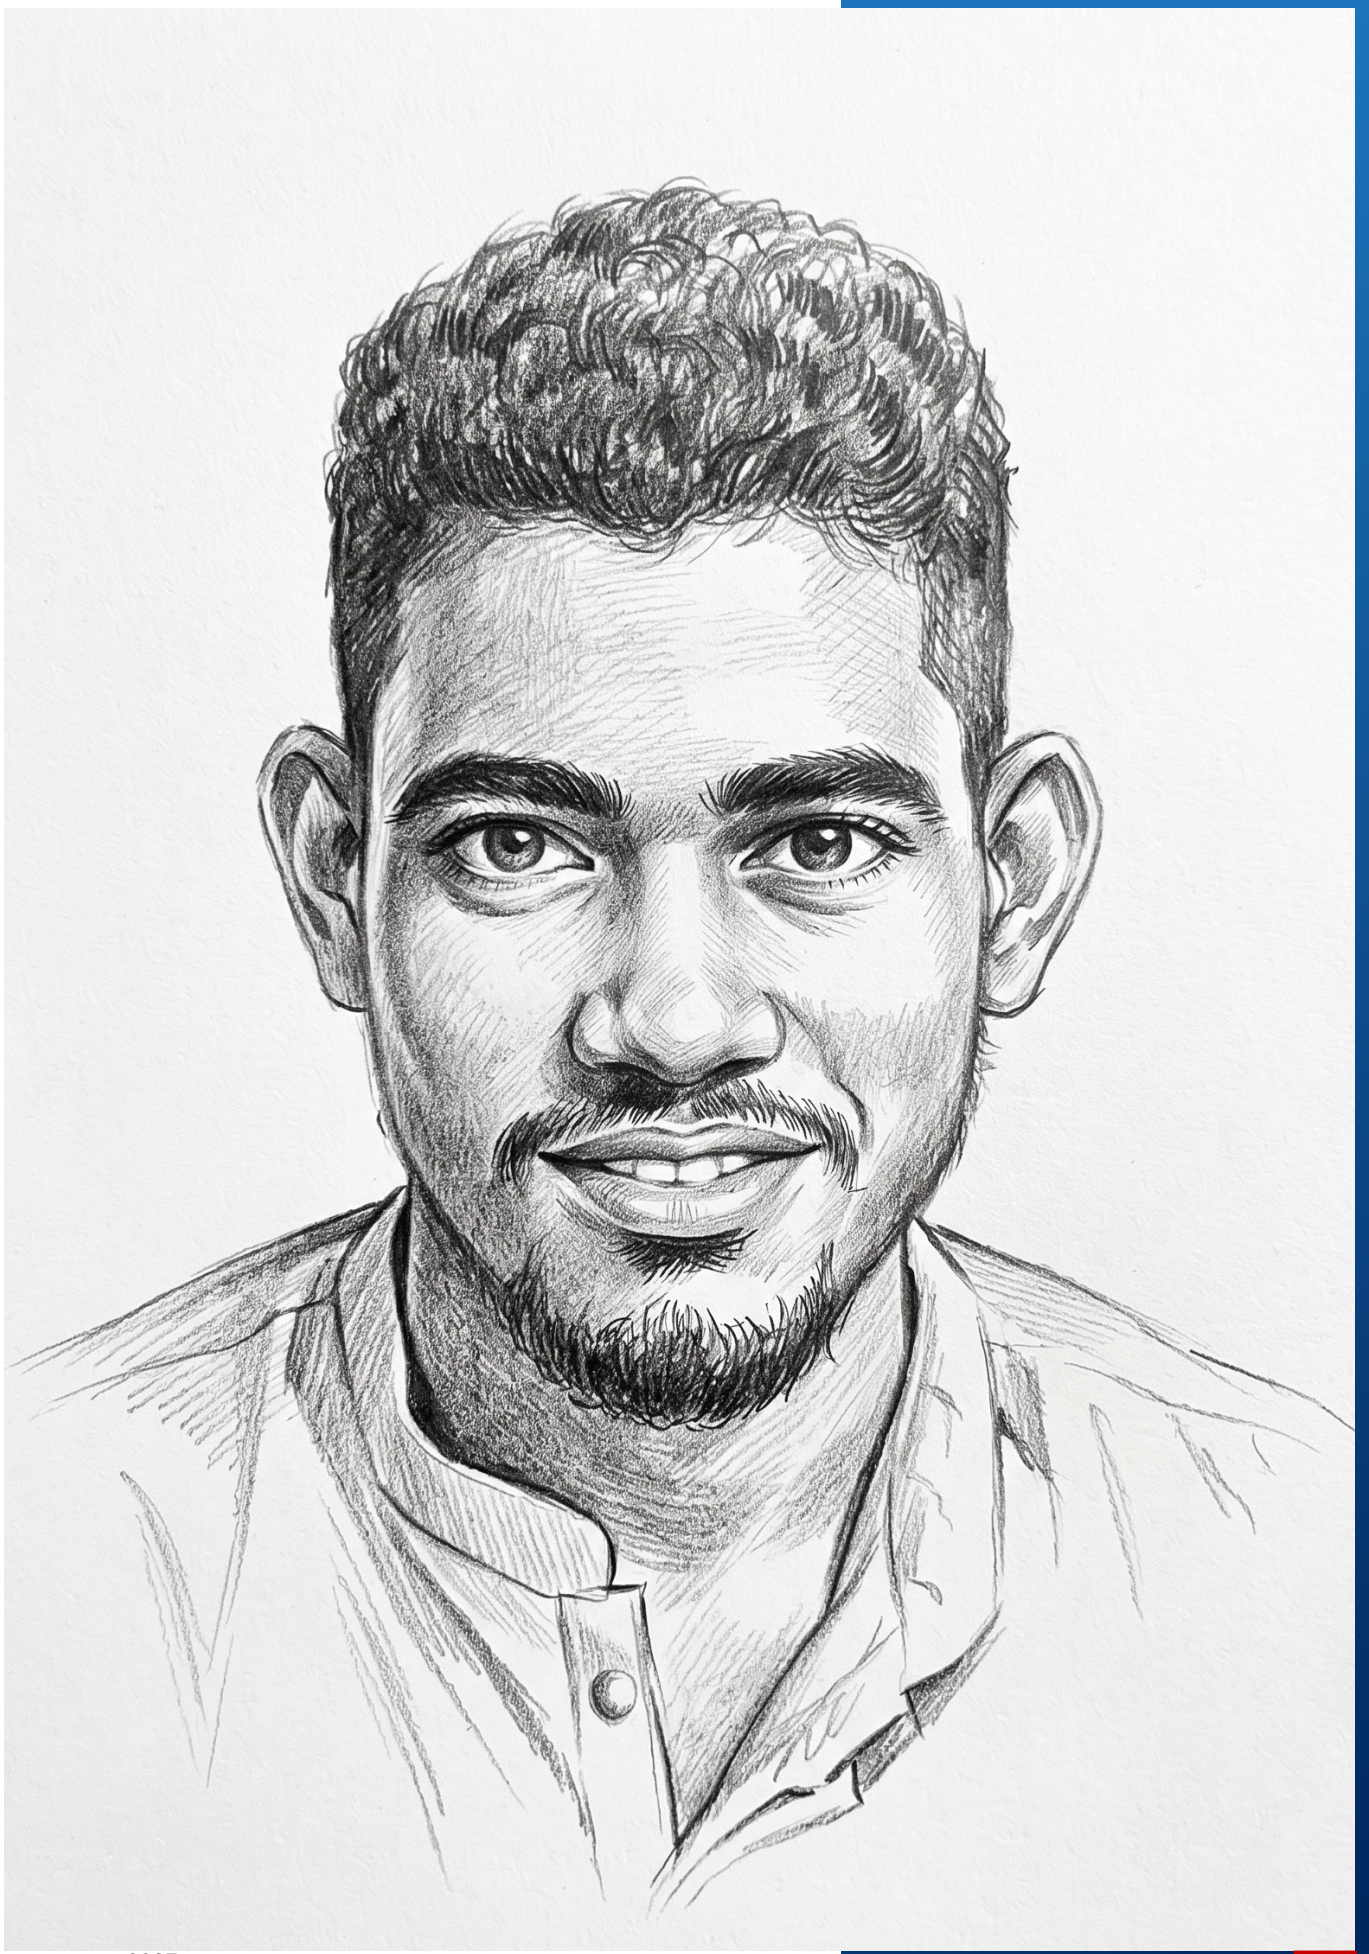

Master Syed Jahangir
A Journey of Hope

Master Syed Jahangir is a 13-month-old child diagnosed with Beta Thalassaemia Major, a lifelong blood disease that requires constant medical care and support. At such a young age, his life has already been marked by frequent hospital visits and the uncertainty that comes with a serious illness.

> Jahangir belongs to a modest family living in Landhi, Karachi. His father works as a daily wage laborer, earning just enough to support a household of six. With four children to care for and limited income, managing the cost and stress of a chronic illness has been an overwhelming challenge for the family. Despite their difficult circumstances, they remain hopeful for a better future for their son.

Through the support of generous donors, NIBD Welfare Society stepped in to provide Jahangir with access to life-saving care. With guidance from expert medical professionals and the backing of compassionate supporters, he is now on a path toward a healthier life.

Jahangir's story is a reminder that even in the most challenging situations, hope can prevail. With continued support, children like him are given not just treatment, but a real chance at a brighter tomorrow.

Mr. Aziz Ur Rehman
Fighting Against the Odds

Sixteen-year-old Aziz Ur Rehman was diagnosed with Aplastic Anaemia, a rare and life-threatening blood disease that severely affects the body's ability to produce essential blood cells. His condition left him extremely weak, vulnerable to infections, and at constant risk of complications, making everyday life a challenge.

> Aziz belongs to a large family of eleven members from Turbat in District Kech. His father works as a laborer, earning a modest income that barely meets the needs of such a big household. Living in a shared family home, they face significant financial and social challenges. Managing a serious illness like this under such circumstances has been overwhelming for the family, both emotionally and financially.

In this time of need, NIBD Welfare Society stepped in with the support of generous donors to provide Aziz access to life-saving care, including a bone marrow transplant. With expert medical guidance and continued support, he is now on a path toward recovery and renewed strength.

Aziz's journey reflects resilience and courage. With the help of compassionate donors, he has been given a chance to heal and look forward to a future filled with hope and possibility

Master Almeer
A Second Chance at Life

Master Almeer, a young child diagnosed with Beta Thalassemia Major, has faced serious health challenges from a very early age. Living with a condition that requires constant care, his journey has been filled with hospital visits and uncertainty, placing emotional and physical strain on both him and his family.

> Almeer lives in Karachi with his family of six. His father works as a coordinator at a private firm, earning a modest income that must support the entire household. Despite having a steady job, the family lives in a single room within a shared residence, reflecting the financial and space constraints they navigate daily. Managing a chronic illness under such conditions has been particularly difficult.

With the support of generous donors, NIBD Welfare Society stepped in to provide Almeer with access to life-saving care, including a bone marrow transplant. Today, he is in the recovery phase, marking a significant milestone in his journey toward healing.

Almeer's story is one of resilience and renewed hope. With continued care and support, he now has the chance to grow, thrive, and look forward to a healthier future, made possible by the compassion of those who chose to give.

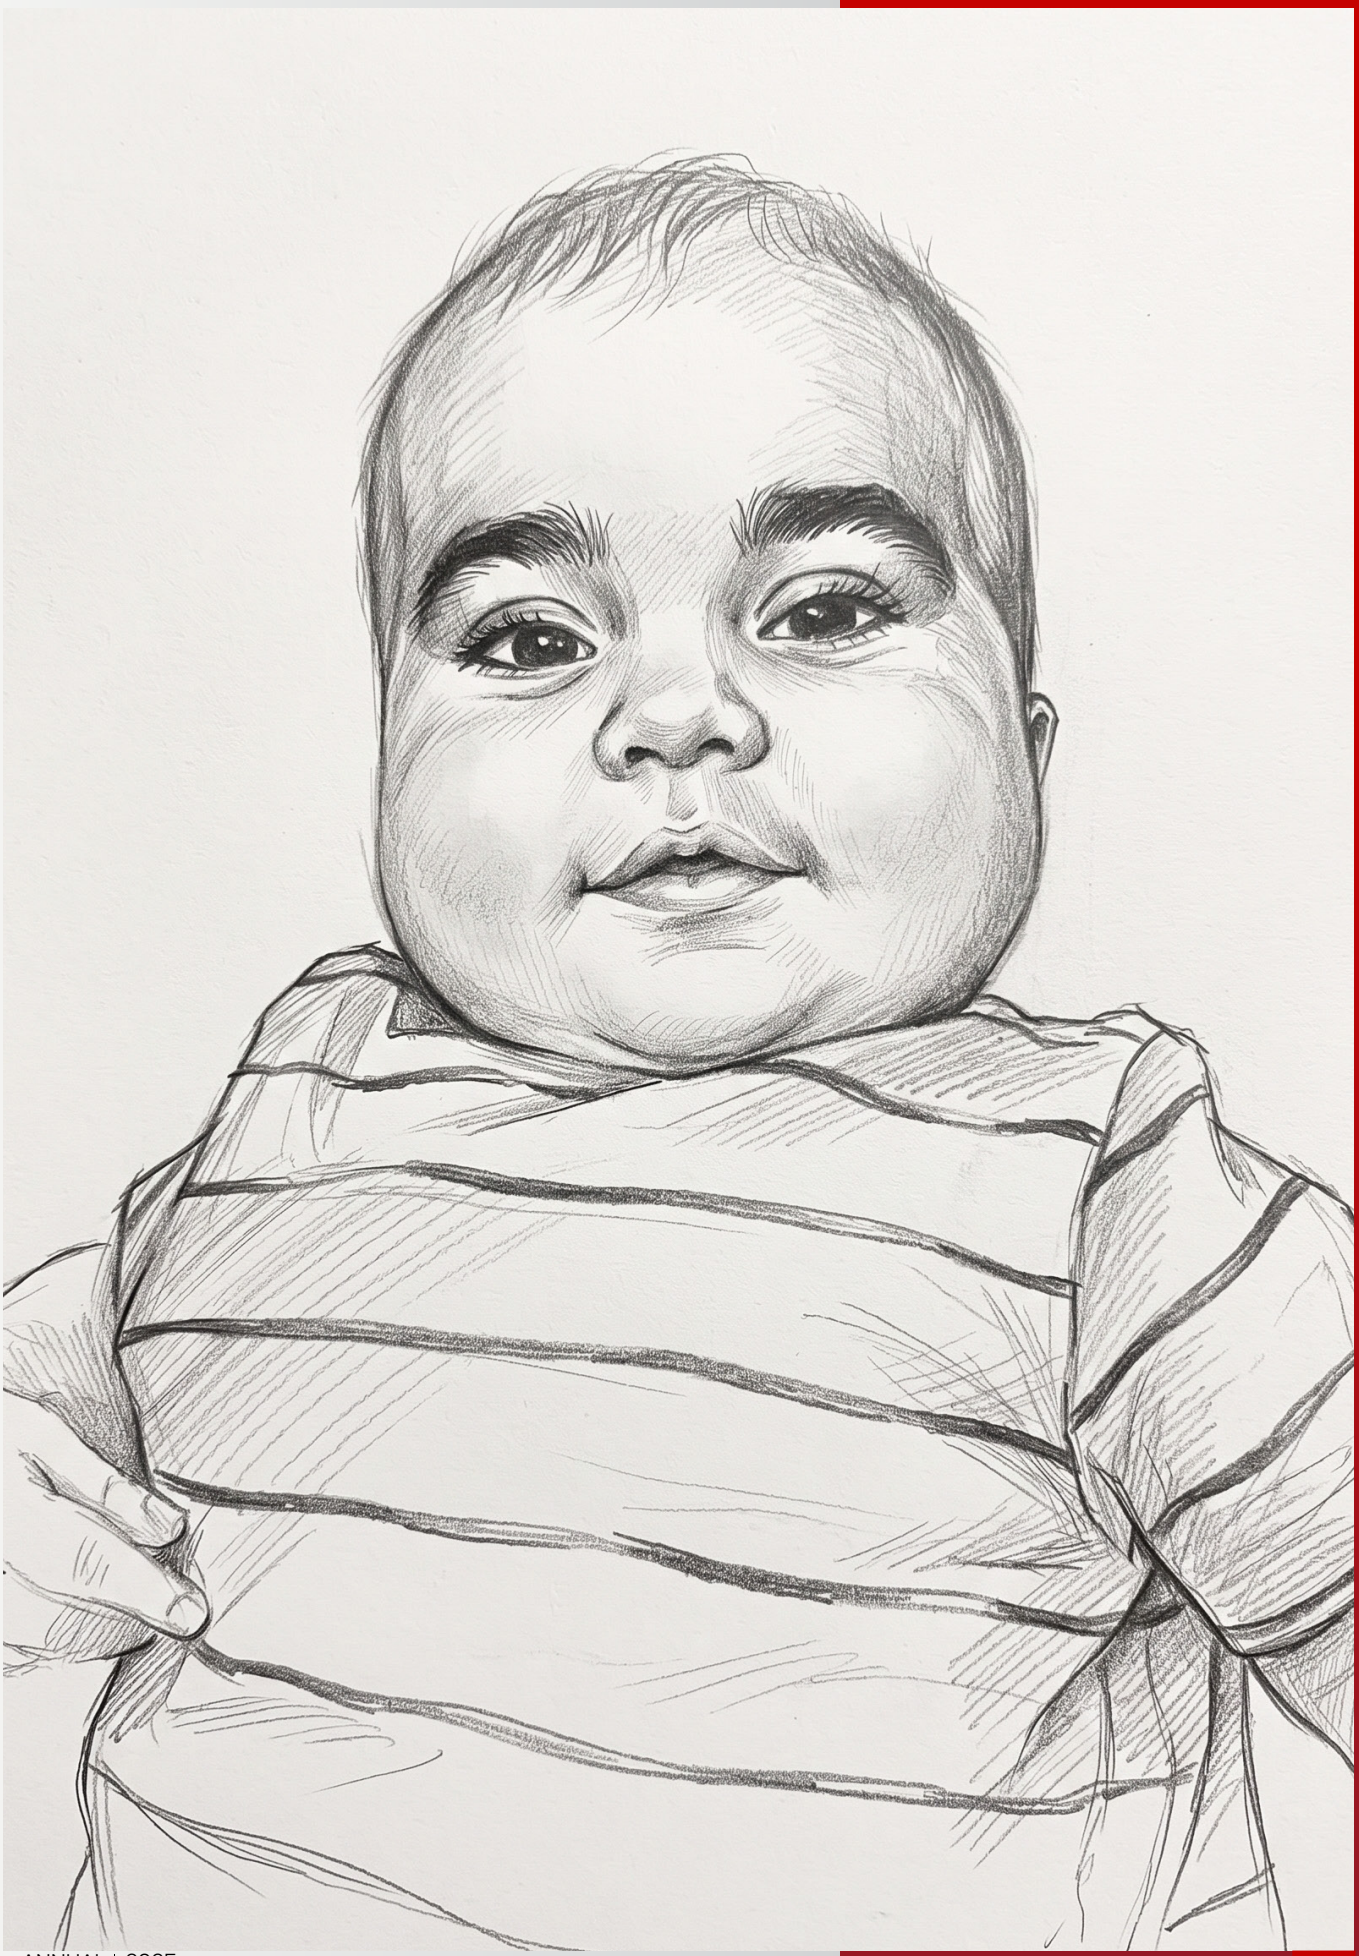

Baby Eman Wafa
A Story of Strength and Hope

Seven-year-old Eman Wafa has spent much of her childhood battling Beta Thalassemia Major, a serious blood disease that demands constant care and attention. While children her age are busy with school and play, Eman's days have often revolved around hospital visits and treatments.

> Eman belongs to a humble family from Pano Aqil in District Sukkur. Her father works as a teacher in a private school, earning a modest income that supports a family of four. Living in a joint family setup, they manage their daily needs with difficulty, making it nearly impossible to bear the burden of long-term medical care. Despite these challenges, her family has remained resilient, holding on to hope for her recovery.

Through the support of compassionate donors, NIBD Welfare Society stepped in to help Eman access the care she urgently needed. With the guidance of experienced medical professionals and the generosity of supporters, she is now moving forward on her journey toward healing.

Eman's story reflects courage in the face of adversity. It is a powerful reminder that with collective support, children like her are given not just treatment, but the hope of a healthier and brighter future.

Master Qasim Bin Qamar
A Journey of Hope

Master Qasim Bin Qamar is a 5-month-old infant diagnosed with Severe Combined Immunodeficiency (SCID), a rare and life-threatening condition that severely weakens the immune system. From the earliest stage of his life, he has faced serious health challenges, with bone marrow transplantation identified as the only curative treatment.

> Qasim belongs to a young family experiencing both emotional and financial hardship. His parents are committed to seeking the best possible care for their child, but the high cost of advanced diagnostic evaluation, transplant preparation, and post-transplant care has placed a significant burden on them. The journey toward treatment has been urgent and deeply challenging.

Through the support of generous donors and the intervention of the NIBD Welfare Society, Qasim was able to access essential pre-transplant evaluation and move forward on the pathway toward curative treatment under specialist care at NIBD & BMT.

His case highlights the importance of timely support in life-threatening conditions where delays can affect outcomes. With donor assistance, a critical step toward survival and recovery has become possible.
Qasim's story reflects the impact of collective compassion and the hope it brings to families facing the most difficult circumstances.

Master Rayyan
A Journey of Courage

Master Rayyan, an 8 and a half-year-old child, has been diagnosed with Aplastic Anaemia, a rare and life-threatening blood disease in which the bone marrow fails to produce sufficient blood cells. This condition results in severe fatigue, increased risk of infections, and uncontrolled bleeding, making timely treatment essential for survival.

> Rayyan belongs to a modest family of five living in Karachi. His father is a graphic designer and the sole earner in the household, with limited income to manage both daily expenses and the high cost of medical care. Despite their efforts, the financial burden of treatment has been overwhelming.

After detailed evaluation at the National Institute of Blood Disease & Bone Marrow Transplantation (NIBD & BMT), a Bone Marrow Transplant with ATG-based conditioning therapy was advised as the only curative option. As no fully matched sibling donor was available, a haploidentical transplant approach was recommended by the treating team.

Through the support of generous donors and the NIBD Welfare Society, Rayyan was able to move forward with the recommended treatment pathway under specialized care. This support has been instrumental in transforming an urgent and critical medical need into a real opportunity for cure.

Rayyan's story highlights the importance of timely intervention and donor support in life-threatening conditions. With continued assistance, children like him are given not only treatment, but a genuine chance at recovery and a healthier future.

IkramUllah
A Journey of Strength

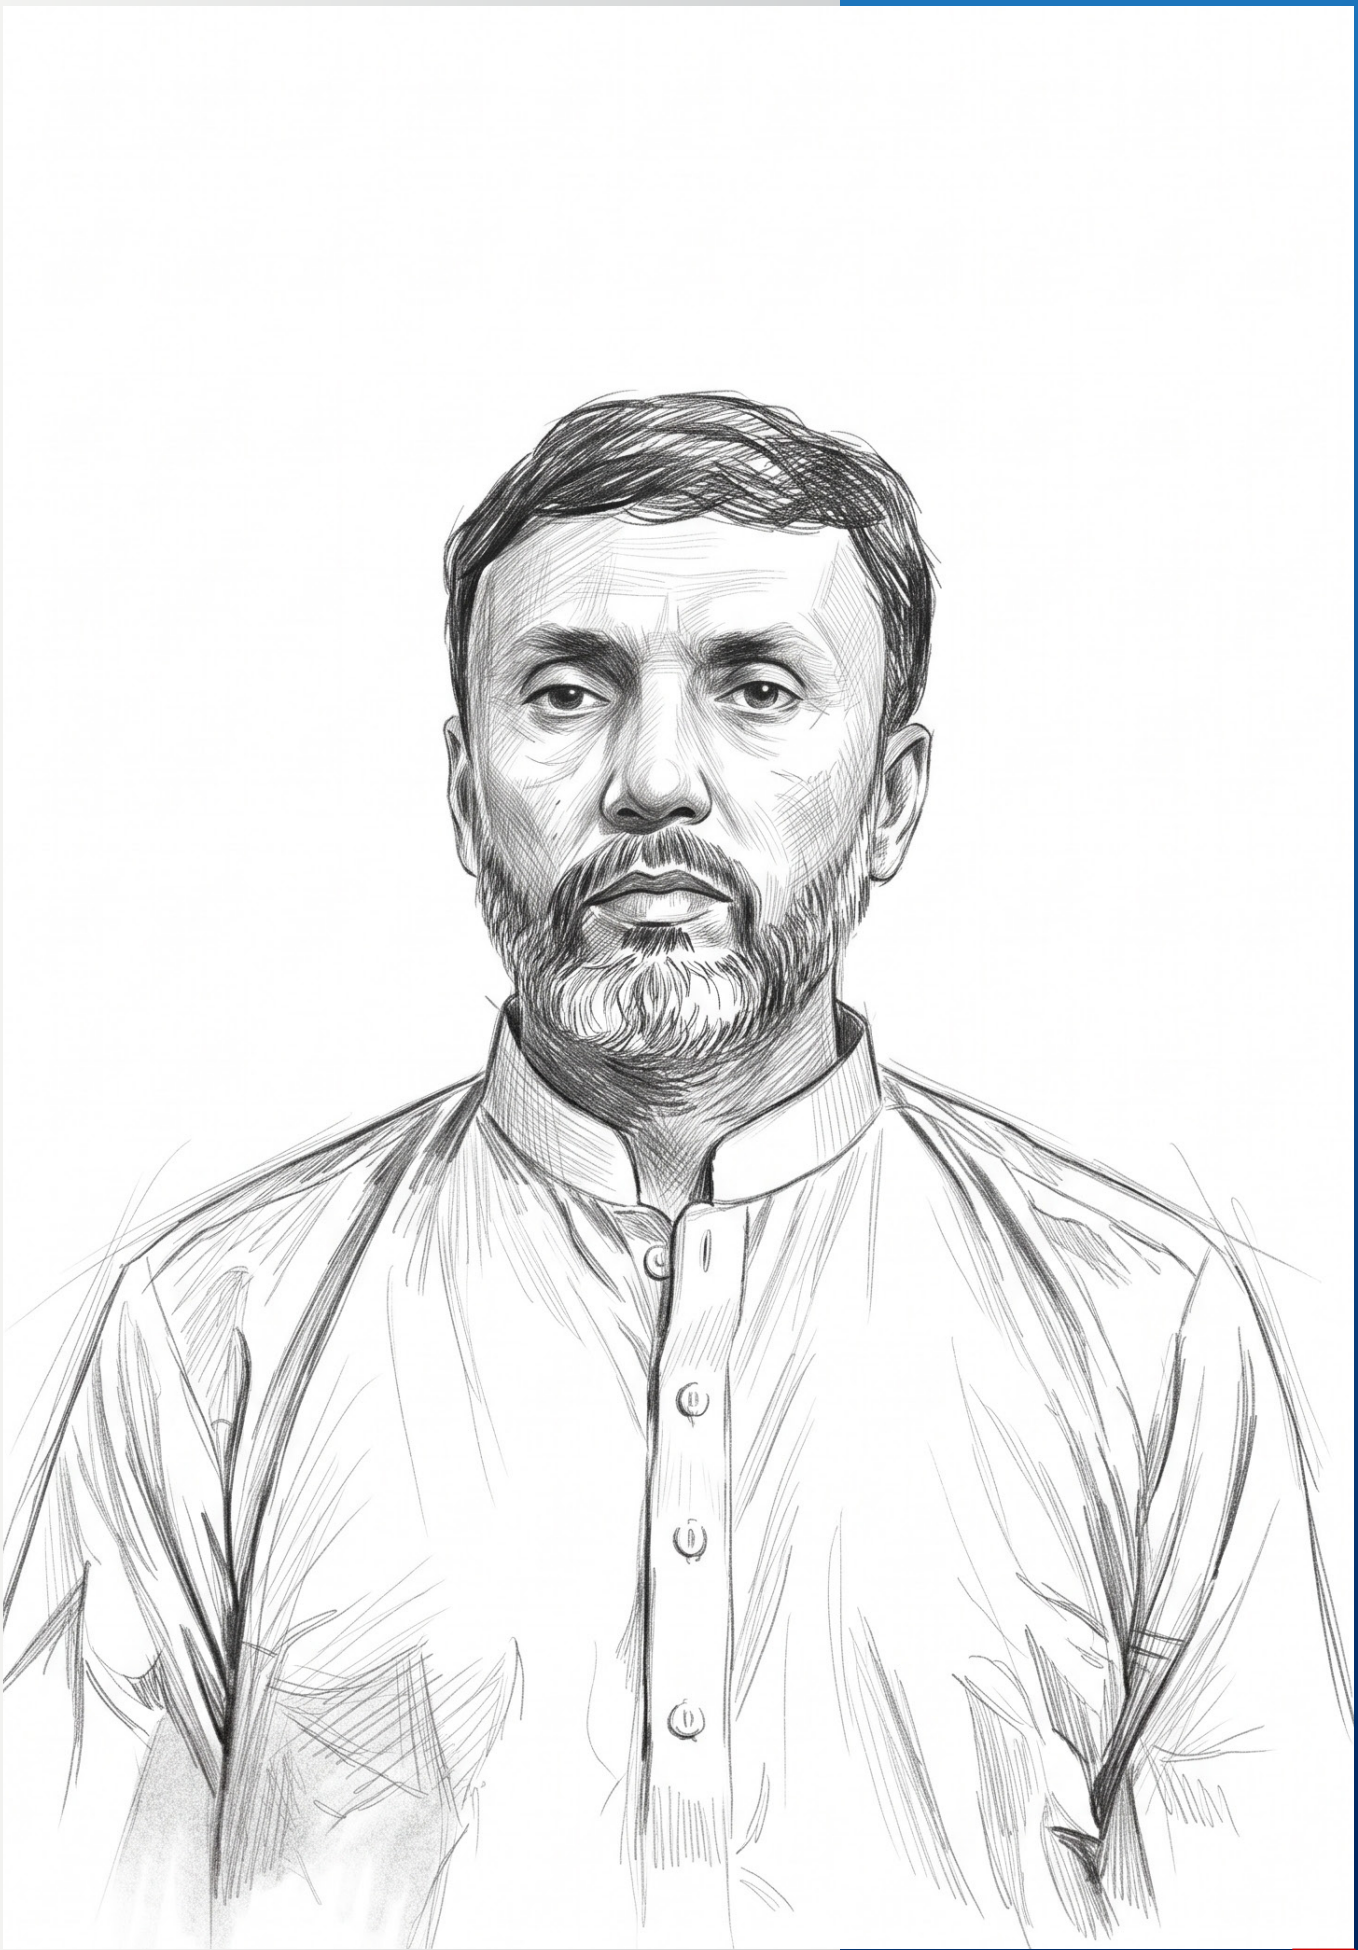

IkramUllah, a 16-year-old boy, has been diagnosed with Aplastic Anaemia, a rare and life-threatening blood disease in which the bone marrow fails to produce adequate blood cells. This condition results in severe fatigue, frequent infections, and a high risk of uncontrolled bleeding, making urgent treatment essential for survival.

> IkramUllah belongs to a large family of nine living in Orangi Town, Karachi. His father is a labourer and the sole breadwinner, earning a limited monthly income that is insufficient to meet both household needs and the high cost of medical treatment. Despite their difficult circumstances, the family remains committed to seeking life-saving care for their son.

Following detailed evaluation at the National Institute of Blood Disease & Bone Marrow Transplantation (NIBD & BMT), a Bone Marrow Transplant with ATG-based conditioning therapy was recommended as the only curative option.

Through the support of generous donors and the NIBD Welfare Society, IkramUllah has been able to move forward on the recommended treatment pathway under specialist care. This intervention has provided a critical opportunity to access curative treatment that would otherwise remain out of reach.

His story reflects the urgent need for timely medical and financial support in complex blood diseases. With continued assistance, patients like IkramUllah are given not only treatment, but a real chance at survival and recovery.

Mr. Ahsan Ali
A Journey of Hope

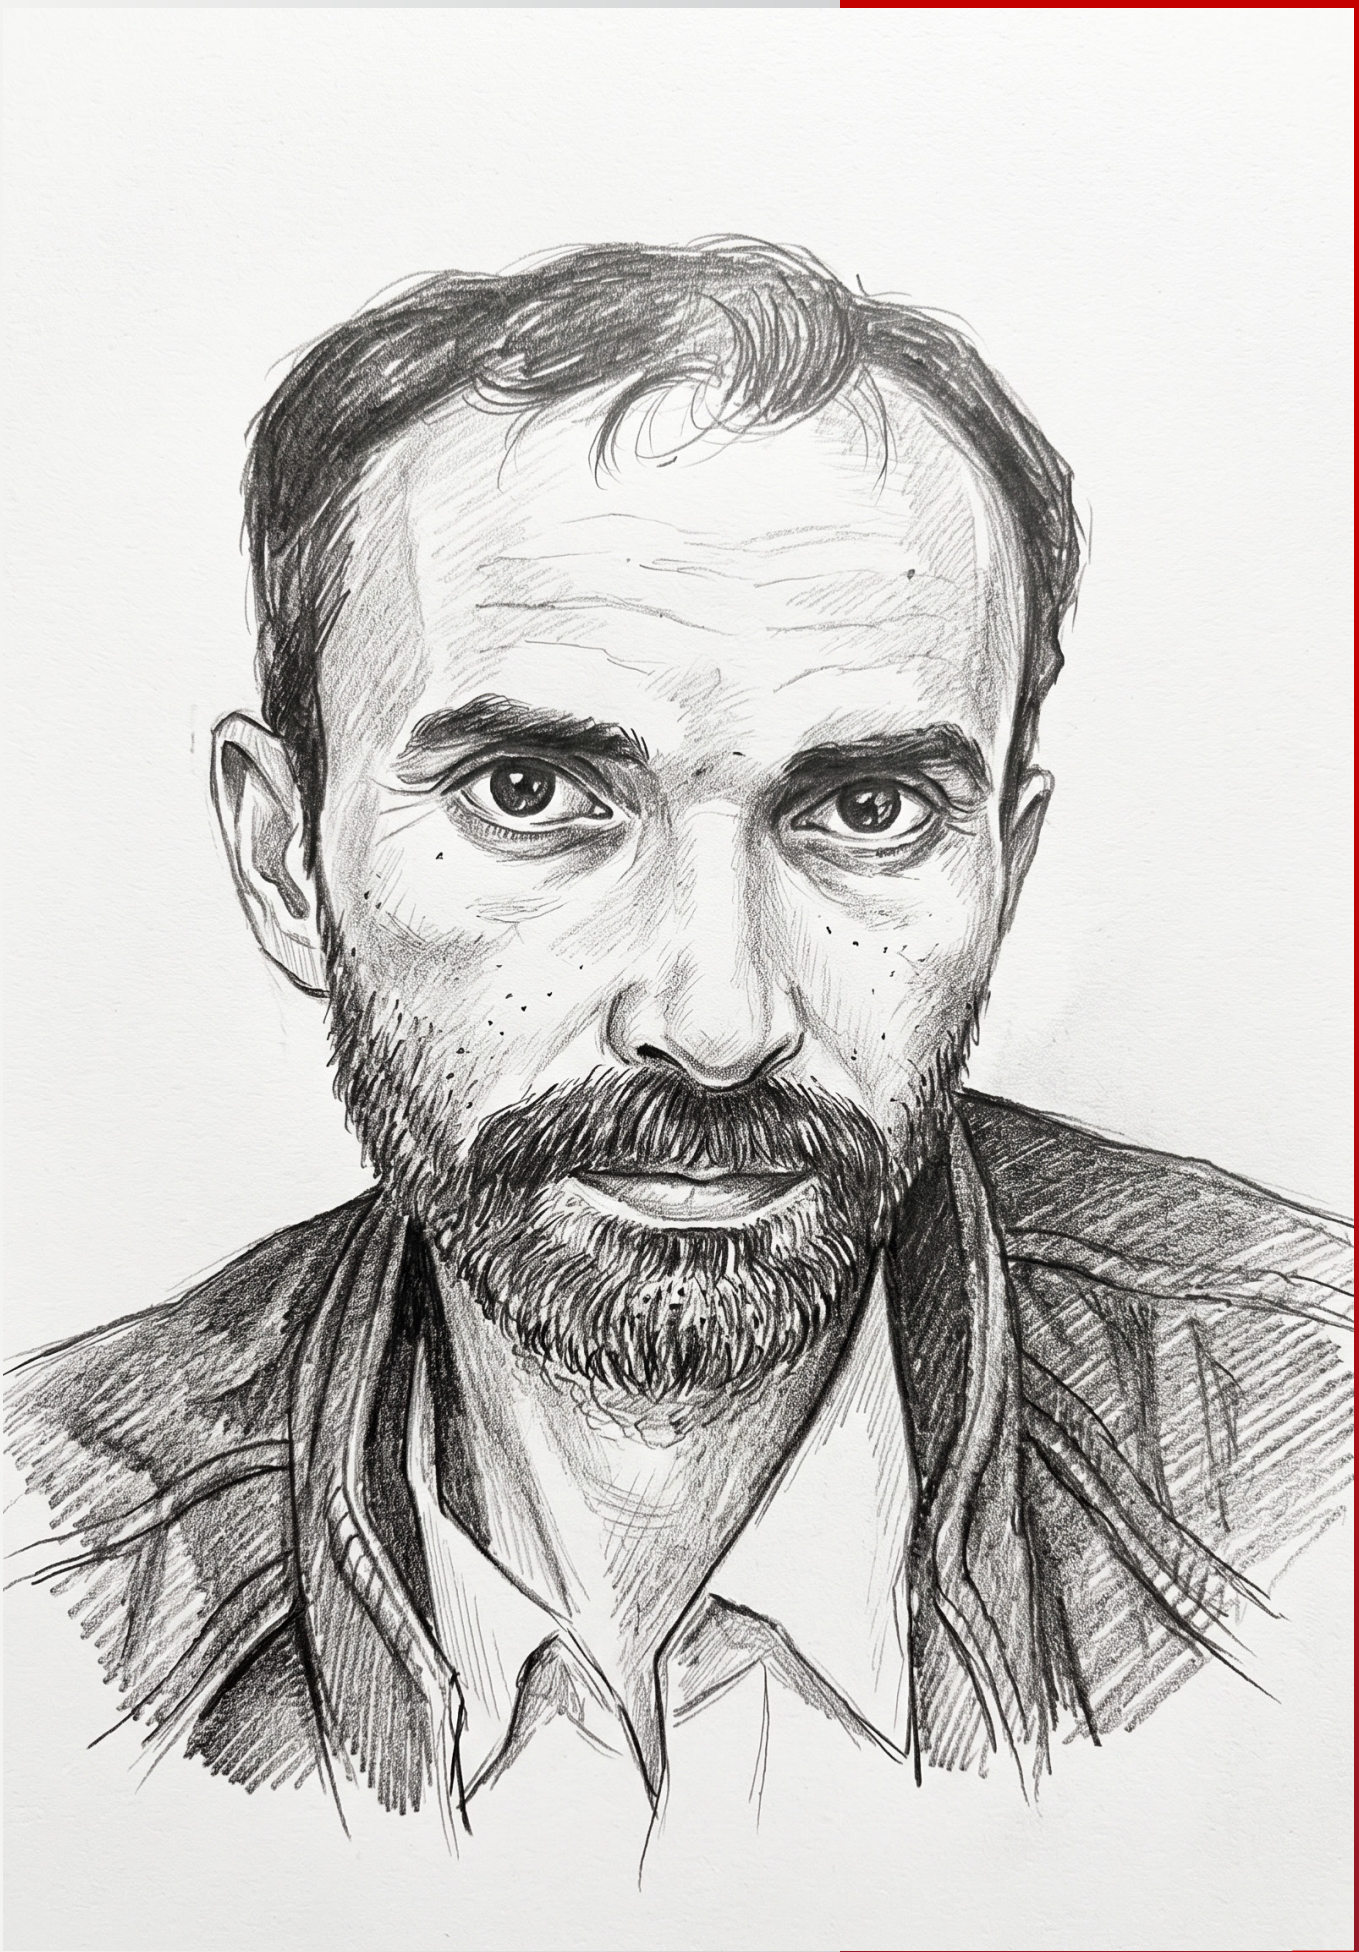

Mr. Ahsan Ali, a 39-year-old patient, has been diagnosed with Hairy Cell Leukaemia, a rare form of blood cancer that requires timely and structured treatment. His recommended treatment plan includes chemotherapy with Injection Cladribine for 5 to 7 days, followed by weekly Injection Rituximab for 8 weeks, along with supportive care medications.

> Mr. Ahsan belongs to a modest family of five living in Sanghar. His family earns a limited monthly income, which is insufficient to manage both household expenses and the high cost of cancer treatment. Despite these challenges, the family remains committed to continuing his care.

Following clinical evaluation at the National Institute of Blood Disease & Bone Marrow Transplantation (NIBD & BMT), his treatment was planned under the supervision of specialist haematology care.

Through the support of donors and the NIBD Welfare Society, Mr. Ahsan has been able to begin his treatment pathway. This support has been critical in ensuring access to essential chemotherapy and specialist care that would otherwise be financially out of reach.

His case highlights the importance of timely treatment in rare blood cancers, where delays can significantly impact outcomes. With continued donor support, patients like Mr. Ahsan are given the opportunity not only for treatment, but for recovery and improved quality of life.

Mr. Muhammad Imran
A Journey of Determination

Mr. Muhammad Imran, a 35-year-old patient, has been diagnosed with Diffuse Large B-Cell Lymphoma (DLBCL), an aggressive form of blood cancer that requires timely and structured chemotherapy treatment. His current treatment plan includes 6 to 8 cycles of chemotherapy, followed by disease re-evaluation to determine the next line of management. He will also require PET-CT imaging and laboratory tests during and after treatment to monitor response and guide further care.

> Mr. Imran works as an electrician and is the sole earner for a family of six. With a limited monthly income, the cost of ongoing cancer treatment and diagnostic investigations places a significant financial strain on the household. Despite these challenges, the family remains committed to continuing his treatment.

Following specialist evaluation at the National Institute of Blood Disease & Bone Marrow Transplantation (NIBD & BMT), his treatment has been initiated under expert haematology care with close monitoring by the clinical team.

Through the support of donors and the NIBD Welfare Society, Mr. Imran has been able to access essential chemotherapy and diagnostic services. This support ensures continuity of care in a disease where timely treatment is critical for response and survival.

His journey highlights the importance of sustained support in the management of aggressive blood cancers. With continued assistance, patients like Mr. Imran are given the opportunity not only for treatment, but for recovery and renewed hope for the future.

Baby Sarah Roshan
A Journey of Hope

Baby Sarah Roshan is a 2-year-old child diagnosed with Beta Thalassaemia Major, a serious inherited blood disorder that requires lifelong medical care and regular blood transfusions. For children like Sarah, a Bone Marrow Transplant offers the only chance of a permanent cure and a healthier future.

> Sarah belongs to a humble family living in Karachi. Her father works as a janitor and is the sole provider for a household of five, including three young children. With limited financial resources, the family faced immense challenges in accessing the advanced treatment required to save their daughter's life.

Despite these hardships, Sarah's parents remained determined to seek the best possible care for their child. Following evaluation by the specialist team at the National Institute of Blood Disease & Bone Marrow Transplantation (NIBD & BMT), a Bone Marrow Transplant was recommended as the curative treatment for her condition.

Through the support of generous donors and the NIBD Welfare Society, Sarah was able to move forward on her treatment journey. Her story reflects the life-changing impact of compassionate giving and serves as a reminder that every child deserves the opportunity to grow up healthy, hopeful, and free from the burden of disease.

Umeed Abhi Baqi Hai Fundraising Gala

The NIBD Welfare Society hosted a fundraising gala titled Umeed Abhi Baqi Hai in Karachi, bringing together philanthropists, corporate partners, healthcare professionals, and community leaders in support of underprivileged patients battling blood cancers and blood diseases.

The event highlighted the growing need for financial assistance for patients requiring bone marrow transplants, chemotherapy, and other critical treatments. Guests were introduced to the Society's impact through patient stories, programme achievements, and testimonials that demonstrated how donor support transforms lives.

A key highlight of the evening was the generous commitment shown by individual and corporate donors, whose contributions will help provide access to life-saving treatment for patients who would otherwise be unable to afford care. The event also served as an opportunity

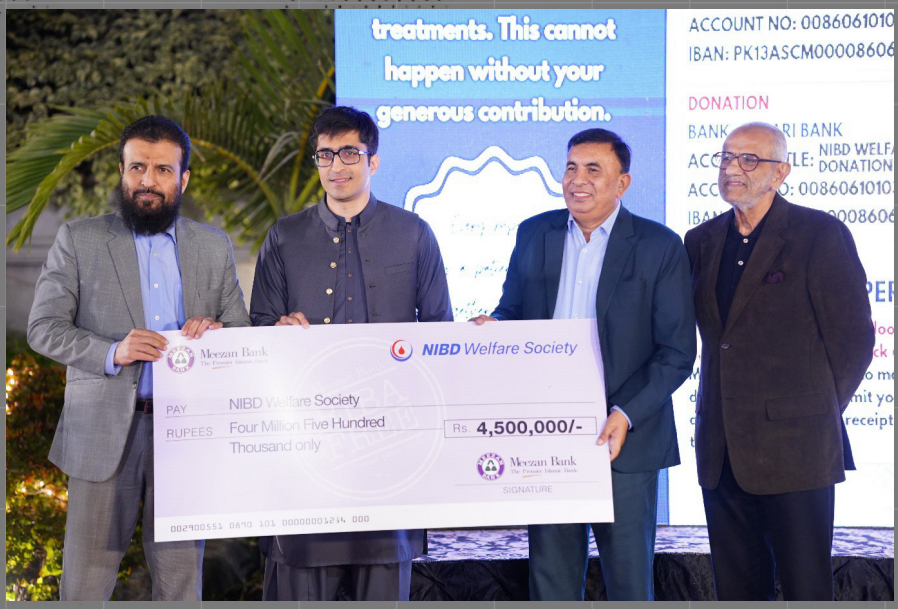

to honour the vision and legacy of the late Prof. Dr. Tahir Sultan Shamsi, whose commitment to equitable healthcare continues to guide the Society's mission.

The overwhelming response from supporters reaffirmed the power of collective action and strengthened the Society's ability to continue providing hope, healing, and access to treatment for vulnerable patients across Pakistan.

BYD Karachi Marathon

PARTICIPATION BY NIBD WELFARE SOCIETY

NIBD Welfare Society proudly participated in the BYD Karachi Marathon held on 4 January 2026 at Nishan-e-Pakistan, Sea View, Karachi.

Through its participation, NIBD Welfare Society aimed to raise awareness about life-saving treatments for patients battling blood diseases and to strengthen its message of hope, resilience, and collective responsibility. The marathon provided a powerful platform to engage the public and highlight the importance of accessible healthcare for all.

A Night of Mercy
A Movement of hope

On February 12, 2026, NIBD Welfare Society hosted its Ramadan Fundraiser at Tabani House, DHA Phase 6, Karachi, under the banner "Rehmat Ka Mahina, Umeed Ka Paigham." The event brought together leading philanthropists and business figures in support of life-saving healthcare for underprivileged patients.

On the spot with additional strong pledges expected to further increase the total. The funds will support 20 bone marrow transplants for patients battling blood cancers, thalassemia, aplastic anemia, and other serious blood diseases.

> Hosted by Mr. Humza Tabani, the event was supported by a distinguished Hosting Committee whose collective efforts underscored the urgency of the cause. Bone marrow transplantation remains a costly but curative treatment, offering patients a renewed chance at life.

STAND-UP COMEDY SHOW

On 14 June 2026, NIBD Welfare Society hosted a successful Stand-Up Comedy Show at Arts Council Karachi, bringing together supporters, families, and community members for an evening where entertainment met purpose.

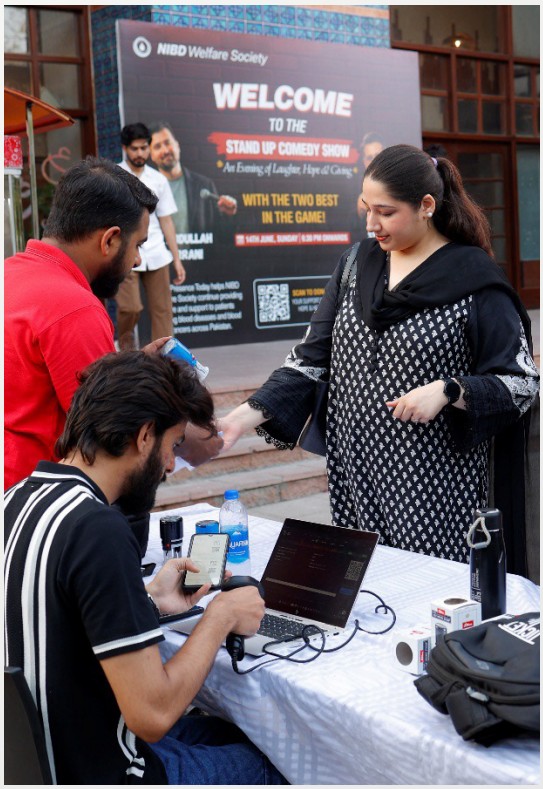

Featuring performances by Ali Abdullah Durrani and Syed Shafaat Ali, the event was a full house and created an engaging platform to raise awareness and support for patients battling blood cancers and blood disorders.

> The event highlighted the power of community-driven fundraising, with proceeds contributing towards life-saving treatments and patient care. It also demonstrated how collective action, even through an evening of laughter, can create a meaningful impact for patients and families in need.

Independent Auditor's Report to the Board Members of National Institute of Blood Disease Welfare Society

Opinion

We have audited the annexed financial statements of National Institute of Blood Disease Welfare Society (the "Society"), which comprise the statement of financial position as at June 30, 2026, the statement of income and expenditure, the statement of changes in funds, and the statement of cash flows for the year then ended, and notes the financial statements, including material accounting policy information.

In our opinion, the annexed financial statements present fairly, in all material respects, the financial position of Society as at June 30, 2026, and its financial performance and its cashflows for the year then ended in accordance with the accounting and reporting standards as applicable in Pakistan.

Basis for Opinion

We conducted our audit in accordance with the International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Society in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the "Code"), and we have fulfilled our Other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Board Members for the Financial Statements

The management of the Society is responsible for the preparation and fair presentation of these financial statements in accordance with the accounting and reporting standards as applicable in Pakistan, and for such internal control as management of the Society determine(s) is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Society's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Society or to cease operations or has no realistic alternative but to do so.

Board Members are responsible for overseeing the Society's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Society's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Society's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Society to cease to continue as a going concern.

We communicate with Board Members regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditor's report is **Moin**.

From Diagnosis To Cure
Bringing Hope & healing in Every Step

At NIBD Welfare Society, we believe that no patient should be denied access to life-saving treatment due to financial hardship. You can help us extend hope and healing by:

01

DONATING
Through our local or international platforms

02

SPONSORING
A Bone Marrow Transplant, giving patients a new chance at life.

03

SUPPORTING
Monthly blood and blood product transfusions for one patient for an entire year.

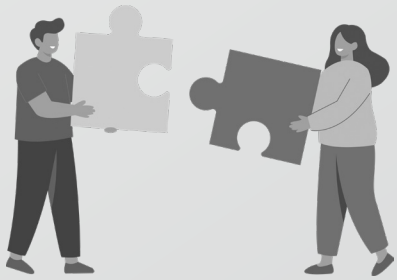

04

VOLUNTEERING
With our awareness and fundraising initiatives.

05

PARTNERING
Through CSR programs to create lasting impact for families affected by blood diseases.

Tax Exemption(s)

> Pakistan Resident Donors: Donations are eligible for tax exemption under Section 2(36) of the Income Tax Ordinance, 2001.

International (Non-Resident) Donors: Through iCareAmerica, a registered 501(c)(3) tax-exempt organization in the United States, international donations are collected on our behalf.
